

# POsItively Business™

Point of Sale for Business! Accounting Software

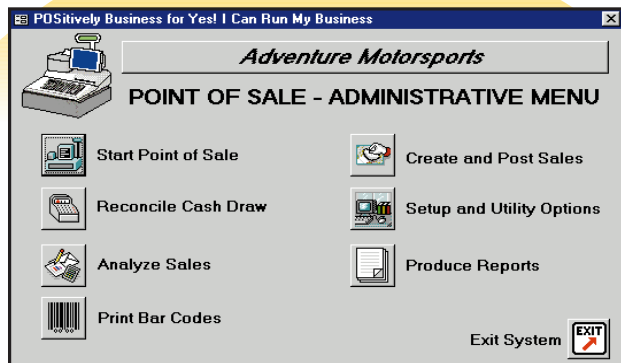

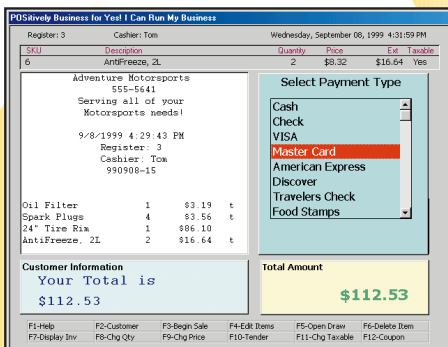

## The Best Point of Sale System For Microsoft® Access Users

- Handles Cash and Customer Sales
- Integrates with all POS Hardware
- Cashier and Customer Friendly
- On Screen Receipt, Customer, and Cashier Info
- Great User Guides for Cashiers and Administrators
- Mouseless interface uses only bar code scanner and keyboard with optional credit card reader
- Define up to 24 different function key tasks
- Complete Administration System for Setup, Reconciliation, Cash Counting, and Register Security
- Includes Bar Code Printing System for Item Labeling, Price Labels, Bin Labels, Register Notebooks, and Serial Number Labels
- Works with Yes! I Can Customer, Inventory, Banking, General Ledger, Invoicing, and Accounts Receivable
- Display your logo or changing pictures with each scanned item
- Handles out of stock overrides and serialized items
- Scan item and change pricing or quantities

The first Point of Sale system written for cashiers and customers. Visual display provides instant feedback. Completely customizable receipts, light pole display, and hundreds of setup options lets you control the way you do point of sale business. Ships with all source code and great documentation.

## ALL SOURCE CODE INCLUDED

## Powerful Payment Processing

- Accept Unlimited Payments of Cash, Check, Credit Cards and House Charges, Credits, Voids
- Handles Manufacturer or Company Coupons
- Handles Multiple Payment Types for Each Sale
- Complete Control of Overpayment and Change
- Optional ID check for checks or credit cards over a user specified amount
- Control cash drawer opening on tender process
- User Definable Receipt Format without Programming
- Optional PC-Charge interface automates credit card processing

Administrative System is controlled by an easy-to-use menu system which lets the administrator select all setup, security, reconciliation, register and cashier tracking, bar code printing, sales analysis, and all reporting. Each workstation can be setup as a cashier station which only displays the Point of Sale screen with a cashier login or the full administrative station with the menu system.

# Reconcile Your Sales, Registers, and Cashiers

## Back Office Reconciliation Just Got Easy!

Display each cashier session and view the register, cash drawer, cashier, time in/out, and all cash balances.

- Verify and edit Starting Cash, display cash sales, count ending cash, analyze differences, and change the status when reconciled
- Change the Register Status when Reconciled
- Use the integrated cash counter to count cash, checks, or coupons
- Display only desired data filtered by register, cashier, date/time, unreconciled amount, status
- Sort the data by any column
- Reports let you keep statistics on sales by register or cashier including efficiency measurements

## Count Cash, Checks, and Coupons

Cash Counter lets you define and maintain all cash types.

- Include checks, coupons and any custom payment types
- Check Counter allows entry of check number, bank routing info, and check amount
- Coupon Counter allows entry of bar code, manufacturer, and amount. Optionally scan coupon's bar code
- Define each type of cash to count including the multiplier
- Separate counters for cash, checks, and coupons
- Automatically retrieve checks and coupons from sales system
- Posts to reconciliation screen when counts are completed
- Save count data for later analysis and editing
- Print all counts and totals

## Print Bar Codes on all Your Items

- Displays all of the products in your inventory
- Select any bar code font family and specific font
- Print item labels, price labels, serial number labels
- Print notebook style lists of products and bar codes for registers
- Select which items to print bar codes for
- Print 1, quantity in stock, or any custom number of labels
- Optionally print description, bar code text, price, and serial number under bar codes
- Print combination labels of bar code/price
- Define your own label types

Keyboard with Credit Card Scanner	\$300
Scanner (Symbol LS 1000)	\$595
Thermal Receipt Printer (Epson)	\$561
Any 1 Bar Code Font	\$149

**Bundle Price Only: \$1,595 Regular: \$2,245**

# Also Available Warehouse Inventory System

Barcode Tracking and Printing for *Business!* Accounting Software

## Processing Option Choices Control System

- Warehouse system handles physical inventory reconciliations, loading dock transactions, or transfers between warehouses using portable data collectors
- Total Inventory data (reconciliation) can be automatically processed within desired tolerances for shortages and overages separately
- Summarize or show all detail for transaction data
- Specify an inventory date which can be used to automatically enter the last date reconciled
- Optional general ledger accounts can be used for entries for reconciliation differences and transaction amounts using quantities and prices
- All settings are saved each time so you only have to select the specific settings you need
- Works with standard bar code hardware
- Use portable data collection devices to collect data
- Includes source code

- Shelf labels for affixing to retail shelves including optional price display
- Warehouse labels for product locations, bins
- Product labels for placing on merchandise with optional serial number barcodes
- Report notebook format for workstation scanning with one barcode per line and detail
- Report notebook format with multiple barcodes per line and less detail
- You select which items to print and how many labels for each product
- Each product displays quantity in stock and lets you print one or more labels per item

- Labels support single roll label printers and laser/inkjet printers on plain paper labels
- Reports use standard Avery brand label stock including two and three column labels
- You can customize any report template using the Microsoft Access report writer
- Each time you change the settings, they are saved for the next time you print
- You control display of product descriptions, bar code text, and prices
